

PHD RESEARCH PROJECT OPPORTUNITY

OCCUPATIONAL EXPOSURE ASSESSMENT

The PhD scholar will work with the Occupational Hygiene team at ECU to conduct research related to the assessment of exposures to newly emerging industries in Western Australia, such as Lithium mining and the production and handling of industrial hemp.

The aim of the project will be to develop appropriate health surveillance programs and guidelines for the industry. The successful applicant will have a background in occupational hygiene, chemistry, occupational health, or other related academic fields and will have excellent communication and project management skills with experience in dealing with the industry, workers, and regulators.

EXPRESSIONS OF INTEREST

Please supply the names of two professional referees and a copy of your academic transcript containing your contact details to Professor Jacques Oosthuizen by Friday, 14 June 2019.
