Plenty to Choose From

Dear Colleagues

The way that the Institute works is always changing, just as people’s expectations and society changes.

Our basic purpose of working to improve the quality of health and safety knowledge and expertise doesn’t alter, but the way we go about it is something we always reflect on.

Membership isn’t just about the things we offer members. We also spend a lot of effort on their behalf like our policy work, building and improving the OHS Body of Knowledge, our work to improve the quality of OHS education, our work to engage regulators, our work on Australian Standards, and much more.

Even so there’s still plenty to choose from when it comes to products. As our revenue grows by drawing from sources other than membership fees, we are constantly investing in building more things that we make affordable or free for members - like EBSCOHost (login) our research database, our mentorship program, our CPD planning tool, our expanding events program and very soon, a growing library of recorded webinars and presentations.

Choose the things that will serve you in your own work, and let us know if there is something we don’t do, that you think we should. At the same time, we’re also working on your behalf to improve health and safety.
Have a great week.

David Clarke, CEO

UPCOMING EVENTS
#SAFETYSCAPE

Connect | Collaborate | Innovate

21-25 May 2018 | Melbourne Convention Centre

#Safetyscape

#SAFETYSCAPE provides an opportunity for all industries working across the wider health and safety profession to come together, exchange ideas and explore industry trends.

The inaugural 2018 #SAFETYSCAPE Convention will enable an array of organisations to assemble as Victoria’s largest gathering of Health & Safety Industry professionals across a week long program of events, workshops, forums, seminars and conferences.

RISK LEADERSHIP WORKSHOP

14 - 15 November 2017

Risk Leadership Workshop

Participants attending the Two Day Risk Leadership Workshop will understand the barriers that prevent ‘Safety First’ becoming an operational reality, particularly within a production driven work environment.

During the session, participants will be challenged to undertake a transformation from safety-based thinking to risk-based thinking by which production/productivity, quality work outcomes and EHS incident mitigation are
