

Press Release

SafeSearch commence data collection for 2011/2012 Remuneration Survey

21st September 2011

SafeSearch are currently seeking participants for our 2011/2012 Remuneration Survey. The remuneration report continues to be the most comprehensive remuneration data for the HSE profession and is utilised by a wide audience including remuneration committees and educators along with Safety, Environmental and HR professionals alike.

This year will mark the 6th year of the survey and SafeSearch will be introducing a number of new features. These include remuneration trend graphs covering the last six years, along with qualitative data to provide greater insights into HSE trends. The survey will also be conducted online, making the data collection process easier for participants.

SIA are proud to again support SafeSearch in this key initiative and encourage all organizations that have more than 5 safety professionals in their team to participate.

Want to get involved in the survey? [Register now](#). Alternatively, please visit the safesearch [website](#) or call them on (03) 9663 5513.
