

New View Safety

Self-paced masterclass

Following the success of our live masterclass sessions during 2022, New View Safety is pleased to announce a self-paced version of our cutting edge professional development program.

Featuring over 15 hours of professional video footage, tools and templates, quizzes, and take-home projects, the self-paced version contains everything you need to kick-start a safety evolution.

Designed by practitioners, for practitioners, the New View Safety masterclass takes you on a journey through innovative safety topics, ranging from learning teams, through to work insights, safety leadership, and just/restorative culture. We have collated models, frameworks, tips and tricks across multiple industry projects to bring you exceptional New View implementation materials.

Our self-paced masterclass is powered by the award-winning learning management system OpenLMS, which guarantees a seamless and engaging experience.

Course Feedback

“Go for it! You learn so much and it challenges how you practice as a safety professional for the better”

“Great to open your eyes to the new styles and approaches to safety in a practical way.”

“The course offers practical insights, balanced with theory and opportunities to accelerate and apply learnings.”

“It’s a fantastic way to think differently about our jobs.”

Dr Tristan Casey

Tristan is an experienced safety professional. Tristan has extensive expertise in translating New View theories into practice. Tristan has implemented New View ideas and methods across multiple large organisations and has amassed a wealth of experience integrating existing systems and processes with New View concepts.

Learning journey

#	Topic	Overview
1	Introduction to New View Safety	Charting the evolution of safety thinking and providing a compelling rationale.
2	Safety leadership	Consolidating safety leadership practice using the 3Ps model.
3	Driving safety change	Introduce and learn how to apply a change management model.
4	Measurement	Set and measure the impact of your safety evolution.
5	Decluttering	Simplify and streamline safety systems and processes.
6	Safety communication and training	Influence for impact and drive sustained training transfer of safety learning.
7	Work insights	Discover the strengths and opportunities of everyday work.
8	Restorative and just culture	Establish a culture of openness and psychological safety.
9	Learning teams	Deploy a team process to maximise continuous improvement and learning.
10	Coaching	Embed your safety evolution through an appreciative inquiry coaching approach.
